CLEVELAND, Dec. 27.—The Iron Trade Review says: "The closing of the year, which has been one of wonnoticeable this year, except when insisted upon by employes, or when made absolutely necessary for repairing purposes. A few mills are closed, but the rule is to operate to the full extent. Not a few Eastern and Virginia furnaces, which were slow in making their contracts for ore, are becoming alarmed for fear that they will not be able to operate continuously during the coming year, which promises to be an exceedingly busy one. There is much more inquiry in all parts of the country for iron for future delivery, and indications are that there will be a heavy buying movement early in the new year.

Eastern furnaces have sold heavily within a few days, and some now announce that they are sold up to their full capacity through the third quarter of 1907.

THE MAGIC OF GENIUS.

It must be conceded by every philosophic and unprejudiced observer that nothing that President Roosevelt can do will serve to abate or lessen his dignity in the eyes of the people. It is the most inscrutable and wonderful of his many gifts. Before it the power and the right of impeachment have become an obsolete tradition. He can no more make himself ridiculous than the Senate can resuscitate the passions with which it assailed Andrew Johnson. Not since the great figure that held the whole stage of Europe a hundred years ago has there been another in history so magically endowed. There is no mystery in all humanity like the mystery of Genius.—
